

SNAKE MAXX: Snake Repellent

SNAKE MAXX powder is formulated based on global brands, which have standardized ingredients that are individually tested for efficacy in repelling snakes.

SNAKE MAXX formula effectively fends off snakes from around your home or structure.

Apply around homes, garages, barns, swimming pools, gardens (not for use directly on vegetable gardens), garden sheds, woodpiles, and other areas where snakes may be a problem. Use carefully in areas where children and pets play. Snake Maxx is biodegradable and, when used as directed, will not harm lawns, gardens, flowerbeds or other desirable plants. The formulation is pet safe. Not for aquatic use. do not apply to crops being grown for food or feed.

SNAKE MAXX can be used to keep snakes away.

- SNAKE MAXX does not harm snakes, instead, it repels them-naturally.
- Unique blend of ingredients that snakes find very unpleasant.
- Biodegradable.
- Apply around homes, foundations, barns and outbuilding, garage woodpiles, shed campsite, - any place where snakes may be a problem.
- Easy to-apply with a comfort grip. Does not contain naphthalene

USER PRECAUTIONS - REMINDER: Some snakes are poisonous; NEVER attempt to pick up a snake unless you are properly trained, experienced and know which species you are dealing with. Handling wild snakes is best left to experts. Contact your local wildlife management office for further information. SNAKE MAXX will NOT prevent snake bites.

HOW IT WORKS:

Snakes can actually taste the air around them via a receptor organ known as the Jacobson's Organ. SNAKE MAXX uses a unique combination of ingredients that creates a powerful taste/scent that snakes find unpleasant and triggers an avoidance behavior. This makes snakes want to escape the area where it is applied. SNAKE MAXX does not harm snakes; it drives them away from areas where people, pets and children may be active.

HOW TO USE: Sprinkle SNAKE MAXX powder a band 6-8 inches wide, around, into or next to the area you wish to protect. It is not necessary to cover the ground completely with the product. One Kilo will treat a band 8 inches wide by 50 feet in length. Do not water in after application. For outdoor use, reapply product after heavy rains or every two weeks to obtain best results. SNAKE MAXX works best and lasts longer when applied to protected areas such as crawlspaces, attics and any areas protected from rainfall. Apply into voids, holes and cracks in and around the structure where snakes may enter. SNAKE MAXX can be applied to the interior perimeter of garages, storage rooms, sheds, out buildings and barn houses. Apply SNAKE MAXX to the

SNAKE MAXX: Snake Repellent

interior perimeter walls of crawl spaces, basements and to sill areas above the foundation walls where snakes may travel or harbor.

INGREDIENTS: Cinnamon Oil; Clove OH, Cedar Oil, Sulfur, Fuller's Earth, Water.

USER PRECAUTIONS- REMINDER:

Some snakes are poisonous; NEVER attempt to pick up a snake unless you are properly trained, experienced and know which species you are dealing with. Handling wild snakes is best left to experts. Contact your local wildlife management office for further information. SNAKE MAXX will not prevent snakebites.

FIRSTAID:
